

BARIATRIC PRODUCTS

Meeting the Special Needs of Bariatric Patients

AMF provides quality solutions for heavier patients — from 300 to 1,000 plus pounds. Whether the need is a mattress, wheelchair cushion or specialty pad, AMF has the equipment, materials and know-how to design and fabricate products exactly to customer specifications. For example, AMF recently manufactured a mattress for a 1,200 pound patient with six-movable pieces to facilitate cleaning.

Each bariatric product is configured to meet defined needs, such as high performance, pressure redistribution or removable side bolsters for mobility. All products in this category are made with antimicrobial, cleanable covers and high density foam for optimal patient support.
